What does APD Electronic Systems consider "Adult Material?"

Any site whose revenue is gained in part or whole from its adult content.

Photos or videos showing frontal nudity on either men or women for non-scientific or non-artistic purposes.

Photos or videos showing graphic violence or death.

Revenue-generating hyperlinks to sites that violate policy #1.

Why does APD Electronic Systems have this policy?

A virtual server is a shared environment where many websites & domains reside on each particular server. This being said, consider that an average "adult site" gets more hits than 100 standard websites. Some of the smaller adult sites get around 5 GB of transfer per day. With these types of resources being utilized, our servers would be severely slowed if we allowed these high traffic sites to also reside on our servers. On top of that, we would be forced to raise our prices to pay for the additional bandwidth. We strive to keep our service offering fast and inexpensive, and our bandwidth clear; therefore, adult sites are not an option.

APD Electronic Systems reserves the right to decide what it considers "adult content", "adult material", "sexually explicit", or "sexually related". Let us know if you are unsure of the approval of your site before placing an order.
